How you acquired knowledge of programming and level of proficiency

I've had various experience with many programming languages such as C, Java, C#, Processing, Matlab, and Arduino through courses I took in Undergraduate and Graduate School. To acquire a minor in Computer Science as part of my Graduate program, I've completed courses in graphic design and video game design. Other languages such as SQL and Python I picked up at work or on my own time because of my hobby of doing coding exercises.
